

IglooMX® Tents

Inflatable Shelters

Be Protected - Whatever The Conditions

Customized MEWP Shelters

One of our smallest yet most functional aircraft shelters, this multi-purpose unit provides an enclosed and portable work space on top of your scissors lift or mobile elevated work platform.

IglooMX® Shelters for LCC's

Our unique range of IglooMX® shelters provide a low-cost, instant and controlled safe working environment in just minutes.

IglooMX® Nose Shelter

These aircraft maintenance shelters are used for several tasks including radome maintenance, windshield replacement, nose landing gear inspection and aluminium/composite panel repair work. Some models enclose the main door and airstairs.

REDUCE ELIMINATE SAVE

- Downtime costs down by 30%
- AOG labor time by 50%
- Hangar movements

Models to suit all Boeing, Airbus, Bombardier and Embraer Aircraft. Other models can be offered on request

An IglooMX® shelter will minimize your AOG downtime and save your organization time and money.

IglooMX® Engine Change

Our best selling, patented Engine change shelters will save you money by reducing the downtime involved in moving the aircraft from the ramp to the hangar while providing a simple solution for aircraft recovery tasks.

REDUCE ELIMINATE SAVE

- Hangar rental costs
- Need for costly construction of one off temporary structures that must to be disposed of after one AOG incident
- Prevention of work from being carried out due to environmental factors

Protect your assets and keep your mechanics productive in a comfortable, warm and dry workspace with an IglooMX® shelter.

IglooMX® Fuselage

Fuselage shelters are ideal for window maintenance and repairs, sheet-metal or composite repairs, application and removal of decals, localized spray painting and door/cargo handling mechanism maintenance and NDT inspections.

REDUCE ELIMINATE SAVE

- Maintenance operational time and associated costs
- AOG downtime, thereby increasing your overall revenue earnings
- Protracted AOG, due to bad weather

Maximize profitability through cost reduction with the IglooMX® shelter range.

JB Roche designed and patented the world's first inflatable maintenance shelter in 1999.

We have continued to develop and improve our IglooMX® stable of products and now offer over 25 different designs that guarantee a hand-in-glove fit for all models of aircraft.

Our fabrics are custom developed and made for use in the harshest environments from -35°C to +70°C ensuring you get the job done regardless of location or time of year.

The IglooMX® is one of the best maintenance investments that you can make with a significant ROI.

Scheduled and unscheduled work by over 500 satisfied users with our IglooMX® is an endorsement that we are proud of.
